PHILOSOPHY OF EDUCATION:

- Students are people made in God's image and must be treated with love and respect, while being held to high standards and behavior
- Quality Christian teaching necessarily requires godly teachers who are actively walking with the Lord feeding on His Word, excited about the world around them and how it reflects His glory, and eager to share this enthusiasm with their students
- Students must be taught not only what to believe but also why to believe it, enabling them to understand and articulately defend their faith
- Our students must be mentally sharp, academically strong, and especially well-educated if they are to successfully withstand the onslaught of a worldly philosophy that will be thrust at them
